

Daycare Manager 1.0.11

A complete solution to manage your Daycare business

Manage your daycare center with this application and get rid of MS excess and also save some trees! Daycare Pro allows you to keep a register of children enrolled, billing, emergency contacts, individuals authorized to pickup with ability to upload their photo and set unique pin of each for safety of the children.

Software Features:

- Keep a detailed profile of each child
- Check in/out a child using a pin assigned to a parent
- Record quick progress notes
- Track their medications
- Record allergies
- Generate invoices for the services of each child
- Track adults authorized to pick up the child (with photo upload and pin)
- Payment history for each account
- Track emergency contacts for the child
- Calendar to manage daycare events
- News module to keep parents in the groove of what's happening

Smart phone / Mobile / Tablet Compatibility:

- Total system is made responsive. So you can manage your business anywhere on the go from any mobile device.

Note: *You can find financial information on next page*

Financial details / (software as a service model)

We do acknowledge your interest in our cloud based Daycare Management System. We have successfully upgraded all our software application on cloud computing which is also called Software as a service model. This model support easy usage and comfortable payment models for clients.

This software will be installed and hosted on our Servers based in United Kingdom and USA. SAAS model offers yearly payment models for clients with more data security, backups with no installation hassles.

Cloud model is pretty simple and straight forward. You can find payment distribution below:
